

Press Release

Gathering of Researchers and Clinicians Under One Roof

[Kuala Lumpur, 8 April 2017] Clinical Research Malaysia (CRM) in collaboration with the National Heart Association of Malaysia (NHAM) organized a full day track on research during NHAM Annual Scientific Meeting 2017.

This Research Track is the first between CRM and NHAM showcasing basic science, translational research as well as late stage clinical research from various institutions in Malaysia including all universities in the areas of Cardiology. The participation of many experienced speakers, abstract presenters and attendees at the event underscores the support for this research track mission which provides a platform to bridge basic and translational research in the area of cardiovascular. The theme "Discover, Collaborate, Translate" summarizes the objective of this initiative, to ensure the continuity of a research culture which is an essence for medical progress.

From 2011 to 2016, there was a total of 77 industry-sponsored cardiovascular studies being conducted in Malaysia, and for the last five years, cardiovascular studies have been in the top three most frequently conducted clinical trials in Malaysia.

According to Dr. Akhmal Yusof, CEO of CRM, it is very important for the Ministry of Health, research institutions and the universities to work collaboratively towards developing a closely-knit research team through the sharing of ideas.

Clinical Research Malaysia (CRM)

Established by the Malaysian Ministry of Health in 2012, CRM exists to advance global health solutions for a brighter, more hopeful future for the people by providing speedy and reliable end-to-end clinical research support for quality studies.

CRM's innate understanding of the local clinical research landscape with the international standards of operations coupled with fundamental backing of the government ministries provide us an incomparable advantage to work with partners from the nascent stages of development to materialisation of the end product, in order to deliver better treatment and high skilled job opportunities.
