CRM TRIAL
CONNECT
11-12 MAY 2023

INTERCONTINENTAL KUALA LUMPUR

ABOUT

CRM TRIAL

CONNECT
2023

Following the success of its first conference in 2022, CRM Trial Connect is now back on its second year, with more interesting program content developed for participating clinical research stakeholders. True to its form in being a one-stop event for multinational clinical trials in Malaysia, the program is set to showcase Malaysia's capabilities, experiences and accomplishments in clinical research.

With 41 faculty members and over 450 delegates attending, the CRM Trial Connect 2023 hosts a bevy of interesting talks, dialogues and presentations from study investigators, industry members and clinical research centers. This year's conference is also being held in conjunction with CRM's International Clinical Trials Day celebration together with Ministry of Health. With patients, investigators and study sites commemorated on the forefront of this event, we also acknowledge new and existing partnerships and collaborations formed over the years that have contributed and elevated the conduct of clinical trials.

It is a great honour to welcome all those who are participating in this conference as it opens a myriad of networking opportunities for clinical research industry players to explore more opportunities in collaboration. With a higher turnout and representation by institutions and investigators this year, the CRM Trial Connect 2023 has all it takes as a platform to connect and grow together.

WELCOME MESSAGE

MINISTER OF HEALTH

YB Dr Zaliha Mustafa

I am pleased to welcome you to an exciting CRM Trial Connect 2023. As the Minister of Health, I wish to emphasise that the Malaysian Ministry of Health continues to acknowledge the immense benefits of a healthy and competitive clinical trial ecosystem. With this acknowledgement comes the motivation for the Malaysian government to fully support the continued growth of clinical research in the country.

Our diverse, multi-ethnic populations, established healthcare sectors, experienced clinical investigators and quality conduct of trials that adhere to international standards make Malaysia a unique destination for clinical research. In addition, Clinical Research Malaysia (CRM) is on the forefront of building a thriving clinical research ecosystem, remaining competitive at the global stage.

The crucial role of investigators, the dedicated clinical trial site team and government agencies, has improved country's reputation as a hub for all phases of clinical research. We appreciate the sponsors, contract research organisations and global institutions selecting Malaysia to participate in multinational trials. And recently, we are proud Malaysia has conducted its first, First-in-Human clinical trial.

I am delighted to note that this year's program includes two crucial topics – tapping into the wealth of potential held within our primary healthcare sector and bringing Malaysia's clinical research ecosystem into the new era of decentralised clinical trials. Primary healthcare providers have established relationships with their patients, and many of the trials conducted at the various *Klinik Kesihatan* nationwide could improve patient outcome. Decentralised clinical trials on the other hand have come to the forefront since the COVID-19 pandemic, and adopting new innovative tools could enable a more diverse group of patient participation, better retention and reducing the burden of participation.

A sustainable and ever-evolving clinical research ecosystem requires all stakeholders' collaboration, to ensure continuous progress and enhancement in this evolving industry. I hope this conference continues to facilitate shared learning and open discussions among key Malaysian and international experts in the clinical research field.

I wish all delegates a successful and fruitful experience during this conference.

FOREWORD

CHIEF EXECUTIVE OFFICER, CRM

Dr Akhmal Yusof

Welcome to the CRM Trial Connect 2023! It's my greatest pleasure to host all of you again in our 2nd conference themed 'Accelerating Malaysia in Global Clinical Trials'.

For those who attended our conference last year, thank you sincerely for making CRM Trial Connect 2022 a resounding success. It has motivated us to develop an exciting program for you this year, highlighting clinical research excellence, dialogues between industry and investigators, global networks of excellence and innovations in clinical trials. We have also introduced dedicated sessions about tapping into the potential of primary healthcare and private centres and patient engagement.

This year's conference also adds a slightly different flavour as it coincides with the month-long celebration of International Clinical Trials Day. We are thrilled to unite and celebrate this day with the clinical research community attending the CRM Trial Connect 2023. It is also the time where we acknowledge the commitment and exemplary achievements of our investigators, sites, sponsors and CROs through the CRM Sponsored Research Awards.

2022 has been an excellent year for clinical research in Malaysia, with the highest number of new sponsored clinical research recorded in the nation and having surpassed the RM 1 billion mark in cumulative Gross National Income generated by the industry since 2012. With our successes come the motivation to push our boundaries and further cement our contribution towards the health and wealth of Malaysia's clinical trial ecosystem.

As a growing and self-sustained organization, we are guided by the principles of HUMANITY, STABILITY and SUSTAINABILITY. We have excellent investigators and trial sites that continually earn top places regionally and globally for patient recruitment. We consistently deliver effective and timely research conduct and are continuously building connections with centres of research excellence and industry leaders, creating sustainable symbiotic research opportunities. In addition, our established regulatory pathways, ethics review committees, and strong connections with industry players, including reputable contract research organisations, will continue to play their crucial roles in ensuring Malaysia marks its distinct footprint in global clinical trials.

CRM Trial Connect 2023 continues to provide the ultimate platform for all clinical research stakeholders to share their experiences and insights, which are essential to ensure that Malaysia's clinical research ecosystem flourishes. In addition, it is a great place to expand your network while maintaining existing connections.

Thank you for being a part of CRM's journey, and I hope this conference provides new opportunities for sharing insights, inspiring conversations and renewing network connections.

ORGANISING COMMITTEE

- Dr Akhmal Yusof (Advisor)
- Ms Audrey Ooi
- Ms Intan Munirah Mohd Murad
- Ms Asha Thanabalan
- Ms Sarena Hasniza Shamsuddin
- Ms Siti Khadijah Sakaria

OUR PRESENCE

OUR STORY

CSI Medical Research (CSIMR) was incorporated in the year 2017 in Singapore. The company has since grown and doubled in terms of employees and revenue. In recent years, we have set up entities in Malaysia (2020), Australia (2022) and Philippines (2023).

OUR KNOWLEDGE AND NETWORK

CSIMR is equipped with extensive knowledge of local regulatory workflow and extensive network of clinical research site within the region. This allows us to provide high quality & consistent services at a more cost efficient point. We value our customers' experiences hence creating a pool of loyal customer base when we treat one another as partners.

OUR STRATEGIC GOAL

We aspire to be recognized as 'S.E.A Most Truth-worthy CRO' by the year 2025 with the main focus of delivering our services in clinical trials within Asia Pacific countries.

Value through
innovation

*Improving the health
of humans and animals
– Our goal.*

Founded in 1885 and family-owned ever since, Boehringer Ingelheim takes a long-term perspective. Around 52,000 employees serve more than 130 markets in the three business areas: Human Pharma, Animal Health, and Biopharmaceutical Contract Manufacturing. For third year in a row, we have been awarded Global Top Employer, becoming one of the world's 15 best employers worldwide.

Besides being certified at the global level, Boehringer Ingelheim has also been named as a Top Employer in Malaysia for the fifth consecutive year, as well as across the region in ASEAN, Korea, Australia & New Zealand.

Talk to the experts

We are uniquely **100% dedicated to the medical industry**. Our high quality and cost-effective medical translation services in over 150 languages make it easier for life sciences organisations to manage and grow their businesses in global markets.

Come and find out how we can help streamline and accelerate your translations activities. We serve:

- Pharmaceuticals
- Biotechnology companies
- Medical device companies
- Contract research organisations (CROs)
- Contract manufacturing organisations (CMOs)
- Regulatory consultants
- Research/management consultants

Many different experts. One critically-acclaimed heart centre.

Known as the most trusted healthcare service provider, IJH offers a full spectrum of healthcare solutions ranging from heart, lung, blood vessel, sleep disorder and many more. Led by experts in different fields, IJH has a proven track record of successfully performed Cardiology procedures and Heart Surgery, annually securing its standing as a Centre of Excellence.

Our expertise in cardiac catheterisation includes performing the Transcatheter Aortic Valve Replacement (TAVI) and MitraClip, which allow for a less-invasive approach and allow the patient to be discharged without hospitalisation. IJH has successfully performed TAVI, MitraClip and other minimally-invasive cardiac procedures in PET, ENH and TEXAS.

CLINICAL INVESTIGATION CENTRE (CIC)

"Leader in Clinical Research"

As a Site Management Organization (SMO) in University Malaya Medical Centre (UMMC), Clinical Investigation Centre is a department dedicated to provide clinical research facilitation services to the pharmaceutical and biomedical industry to conduct quality and safe clinical studies in UMMC. Our dedicated clinical study unit is custom built and well equipped to meet the demands of conducting international multi-centre clinical studies which are supported by global standards of Good Clinical Practice, Standard Operating Procedures and Quality Assurance.

We are proud to be a part of the country's premier teaching hospital, with an integrated network of experienced clinical investigators and large pool of potential study subjects including healthy volunteers.
